

How EHCSF is Eliminating Hepatitis C in San Francisco

As a collective impact initiative, we gather diverse, multi-sector partners to collaboratively guide hep C elimination in SF...

Which strengthens the landscape for hep C prevention and treatment...

Data-Driven Planning

We strategically use data to ensure that resources for hep C prevention and treatment are tailored for the populations most impacted.

Community Collaboration

We invest in, convene, and support partners to build community, exchange expertise, and co-create culturally responsive, impactful, and sustainable hep C initiatives.

Education & Advocacy

We educate CBOs, clinicians, and the wider community about hep C. We advocate for policy change to increase hep C testing and treatment.

So that hep C services are implemented as impactfully as possible...

We test and diagnose people living with hep C who don't know it.

We treat people who would otherwise not been reached by hep C services.

We engage leaders with lived experience of hep C in co-creating impactful interventions.

We create visibility around hep C to foster cross-sector partnerships and investment.

To ultimately...

Prevent new hep C infections

Reduce hep C-related illness and death

Maximize the number of hep C cures

...and eliminate hep C as a public health threat in San Francisco
